

DUST BAG MEASURING GUIDE

SNAP BAND TOP LOAD DUST BAG

BAG LENGTH MEASUREMENT

Dimensions of Midwest Filter's dust collector bags are critical for proper installation, effective cleaning, and optimum performance. When requesting and/or receiving a quote from MWF please be aware of standard measurements.

DIAMETER MEASUREMENT

How to convert between flat width and bag diameter:

If flat width (FW) is provided:

$$\text{Diameter} = \frac{(\text{FW} \times 2)}{3.14}$$

If diameter is provided:

$$\text{Flat Width} = \frac{(\text{Diameter} \times 3.14)}{2}$$

$$3.14 = \pi (\text{pi})$$
